FOR IMMEDIATE RELEASE

FreedomVOICE Celebrates 10 Year Anniversary

San Diego, CA - January 30, 2006 - FreedomVOICE Systems, a leading provider of personalized communications management tools, today announced its 10th Anniversary.

Founded in 1996, FreedomVOICE develops and markets feature-rich voice and fax messaging services, as well as a lead/call capture system for real estate, that enable businesses and professional offices of any size to communicate more effectively with their customers and clients. These services also eliminate the need to purchase costly phone, fax, and lead management equipment, potentially saving thousands of dollars. Services start at just \$9.95 a month depending on account features.

These tools and services allow a company of any size to project a positive, polished image. In addition, the company can stay connected to the customer around the clock whether it's providing recorded information after operating hours or transferring callers live during business hours through a call management system.

"As we look forward to our second decade of developing everything from web and teleconferencing tools to voice-over-IP products, we also look back with gratitude for the support we have received from our loyal customers," said Eric Thomas, founder, president & CEO of FreedomVOICE.

"Think of it this way, FreedomVOICE is a lot cheaper than a shrink," says Kate Lister, owner of Biplane, Air Combat & Warbird Adventures. "The phones were driving us nuts," she says. "We found ourselves repeating the same information about our vintage biplane rides over and over. So we tried an answering service, and they couldn't begin to explain what we do. Several times a week, now, we receive calls from folks making a reservation who say our phone service is the most fun and the most informative of any they've ever used. More than one person has been actually disappointed when we answered! It's no exaggeration to say that our business is taking off thanks to FreedomVOICE." To experience how the Biplane, Air Combat & Warbird Adventures take advantage of FreedomVOICE capabilities call 800-403-1332.

By offering everything from simple 800 toll-free services to more advanced features, as well as low prices, flexibility and commitment to service, FreedomVOICE has served tens of thousands of home and small businesses.

"FreedomVOICE's 10th year of business is an important milestone. We've built a financially stable company, with solid architecture that is designed for substantial growth - this is no small achievement when compared to the state of some of our competitors. We've made the architecture feature-rich and on the cutting edge of technology which our customers very much appreciate. But the thing that has made the most difference is that we've always put the customer first – we truly care about treating the customer right, getting them the best support, and making sure the service is the best it can be. That's what counts."

FreedomVOICE has grown an average of 93% per year since its formation. While this increase can certainly be attributed to customers, FreedomVOICE also credits their employees' dedication and diligence in delivering quality product and services. They are diverse and passionate – they work hard and genuinely enjoy serving others.

About FreedomVOICE

Founded in 1996, FreedomVOICE Systems (FVS), www.freedomvoice.com, develops and markets affordable, feature-rich voice messaging systems and services that enable businesses and professional offices of any size to communicate more effectively with their customers, clients, patients and associates. FVS developed its own software and, as a result, is one of the few companies in the field with flexible technology architecture, enabling its responsive engineering team to quickly customize a voice message system to any customer's specific needs. The company offers everything from simple 800 toll-free services to more advanced applications, including Unified Messaging, Interactive Voice Response and fax services through its FaxFreedom website www.faxfreedom.com as well as a lead/call capture system for real estate at www.addtrakker.net.
