FreedomVOICE Reports Record Revenues for Q1, 2006

ENCINITAS, Calif. – FreedomVOICE Systems, a leading provider of enhanced 800 voicemail and virtual office services, is excited to report it has reached a record breaking quarter in revenue for Q1 2006. Revenues for Q1 2006 exceeded the previous quarter's revenues by almost 10%.

Eric Thomas, CEO and founder of FreedomVOICE, attributes this growth to the feature rich voice and messaging services that FreedomVOICE offers. These services were created by listening to the needs of customers and prospects, which include affordability, flexibility, and outstanding client services. He also attributes the growth to the efforts of the company's strong agent sales channel throughout the US and Canada.

"FreedomVOICE offers a suite of services including voicemail services that allow small and home based businesses to project the professional image they need in order to compete with larger companies, 800 call capture systems that allow real estate professionals to automatically capture leads 24/7, and electronic faxing solutions, but one of the things that sets us apart from other companies is our flexibility", said Eric Thomas, CEO and founder of FreedomVOICE. "FreedomVOICE developed proprietary software, and as a result, is one of the few companies in the field with flexible technology allowing our responsive client services and programming teams to quickly customize a solution for our customers' specific needs."

Thomas goes on to say, "Not only have we been able to develop flexible, feature rich, reliable services that allow our customers maximum growth potential, we are also able to boast superior customer support ratings by both internal and external audits. Reliable, responsive, and friendly customer support is critically important to the success of our business, and I'm proud to say that our platinum level of customer support has resulted in happy loyal customers." Thomas adds, "A huge part of our business is attained from referrals and word of mouth."

Mr. George Ama III, CEO and Founder of Kid Safe Child ID Network, Inc and a FreedomVOICE customer since 2001, said, "As a mobile company, working with FreedomVOICE Systems has increased our business volume and it has revolutionized how we approach Customer Support and Sales efficiency. Our staff is able to field calls from our clients anywhere we have a phone available! By using the FreedomVOICE System Solution we have saved our company more than one hundred thousand dollars in new phone equipment that does a quarter of what FreedomVOICE provides. "

Thomas added, "FreedomVOICE Systems will continue to grow and report strong sales growth by listening to our current and future customers' needs, allowing us to release the technologies and services they need to take their business to the next level of success."

About FreedomVOICE

Founded in 1996, FreedomVOICE Systems (FVS) develops and markets affordable, feature-rich voice messaging systems that enable businesses and professional offices of any size to communicate more effectively with their customers, clients, patients, and associates. FVS developed its own software, and as a result, is one of the few companies in the field with flexible technology architecture, enabling its responsive engineering team to quickly customize a voice messaging system to any customer's specific needs. The company offers everything from simple 800 toll-free services to more advanced communications, such as Unified Messaging, Interactive Voice Response, and fax services.
