FreedomVOICE to Attend Direct Selling Association Annual Meeting

ENCINITAS, Calif. – FreedomVOICE Systems, a leading provider of enhanced 800 voicemail and virtual office services, announces that the company will be exhibiting at the Direct Selling Association Annual Meeting, being held June 4-6, 2006 at the Boca Raton Resort & Club in Boca Raton, FL.

The Direct Selling Association (DSA) annual meeting is an event that brings together the top industry leaders and executives from the direct selling industry for in-depth education on industry trends, strategies, and new approaches for continued growth. Each year DSA supplier members gather to present new, cutting- edge products and services to support the growth and success of direct selling companies found anywhere. This year the meeting is expected to host more than 900 direct selling executives, suppliers and friends of the industry.

FreedomVOICE Systems will be demonstrating the effectiveness of using a toll-free voicemail system to provide 24/7 recorded information on a company's products and opportunity as well as the company's unique ability to capture the contact information, including phone number, name and address of calls into the system.

Eric Thomas, CEO and founder of FreedomVOICE, commented, "FreedomVOICE offers feature rich voicemail solutions to support the direct selling industry's continued growth, including the ability to design turnkey systems that come pre-loaded with recordings and faxes on a company's services, products and opportunity. This is a great sales tool to get information into prospects' hands 24/7. We've also found this to be a great sales tool for new sales representatives that may need help with their sales presentation. We will have the sales script that's been proven to work for a particular company professionally recorded and loaded onto each company's unique system that all sales representatives will have access to. Thomas continues, "Since 1996 I've

come to understand that there aren't many companies that fit a standard cookie cutter mold. Fortunately, FreedomVOICE developed proprietary software, and as a result, is one of the few companies in the field with flexible technology allowing our responsive client services and programming teams to quickly customize a solution for any business's specific needs."

Thomas goes on to say, "The DSA annual meeting is an ideal venue for us to demonstrate the robust capabilities of our enhanced toll-free voicemail systems, including our unique ability to capture phone numbers, names and addresses, to the highest concentration of direct selling professionals. Our sales and marketing team will be on hand to address any questions regarding features, benefits, and custom applications."

FreedomVOICE encourages direct selling companies to stop by booth #801 June 4-6 to get more information on the company's 800 call capture system that has helped thousands of businesses achieve their goals and dreams since 1996!

About FreedomVOICE

Founded in 1996, FreedomVOICE Systems (FVS) develops and markets affordable, feature-rich voice messaging systems that enable businesses and professional offices of any size to communicate more effectively with their customers, clients, patients, and associates. FVS developed its own software, and as a result, is one of the few companies in the field with flexible technology architecture, enabling its responsive engineering team to quickly customize a voice messaging system to any customer's specific needs. The company offers everything from simple 800 toll-free services to more advanced communications, such as Unified Messaging, Interactive Voice Response, and fax services.
