## **FreedomVOICE Introduces Reservationless Teleconferencing**

ENCINITAS, Calif. – FreedomVOICE Systems, a leading provider of enhanced 800 voicemail and virtual office services, has launched teleconferencing, a reservationless conference calling service that gives you a permanent toll-free number that is available 24/7 for your conferences.

Eric Thomas, CEO of FreedomVOICE, said the service was designed to simplify the process of teleconferencing by allowing any business, regardless of size, to conduct a conference at their convenience, 24/7, without having to schedule the conference first. Users simply dial their toll-free number and enter their designated PIN to start conferencing at anytime. Operator and participant keypad controls allow for easy management.

“We are constantly looking to develop innovative communication tools that will allow our customers to successfully grow their business, increase their profits, and beat out competition by always utilizing the most up to date communication services,” said Thomas. “We want our customers to be able to count on us to provide them with the tools they need, so they can focus on their core business.”

Thomas continues, “Teleconferencing is a natural fit for the suite of communication services we already provide including 800 voicemail, virtual office services and Internet fax services. Our 800 voice mail and virtual office services allow thousands of entrepreneurs to enhance their company image, and increase their productivity and sales through features typically only offered through costly, sophisticated phone systems, while FaxFreedom, our stand alone Internet faxing service allows you to send and receive faxes from any computer in the world. The people taking advantage of these sorts of services will likely want to take advantage of the conferencing as well.”

For current FreedomVOICE Systems customers the teleconferencing service is only \$5 per month with per minute rates as low as 4.5¢ per minute per attendee. FreedomVOICE will also offer a stand alone teleconferencing service

at a toll-free rate of 12¢ per minute per attendee or a local number rate of 7.9¢ per minute per attendee, coming soon.

Thomas concludes, "FreedomVOICE Systems will continue to grow by listening to our current and future customers' needs, allowing us to release the technologies and services they need to take their business to the next level."

### **About FreedomVOICE**

Founded in 1996, FreedomVOICE Systems (FVS) develops and markets affordable, feature-rich voice messaging systems that enable businesses and professional offices of any size to communicate more effectively with their customers, clients, patients, and associates. FVS developed its own software, and as a result, is one of the few companies in the field with flexible technology architecture, enabling its responsive engineering team to quickly customize a voice messaging system to any customer's specific needs. The company offers everything from simple 800 toll-free services to more advanced communications, such as Unified Messaging, Interactive Voice Response, and fax services.
